

# Single Sign-On (SSO)

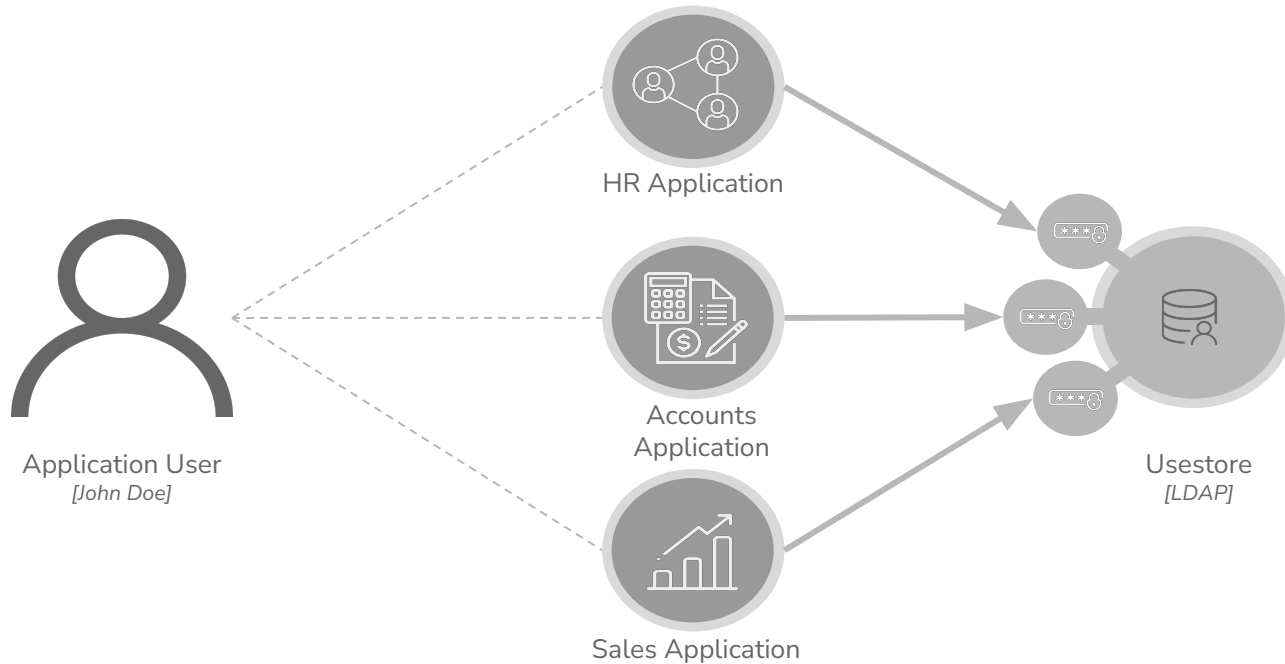

# Application Ecosystem

A typical organization has to manage multiple applications

# Centralized Access Control

Centrally manage user accounts and apply control policies

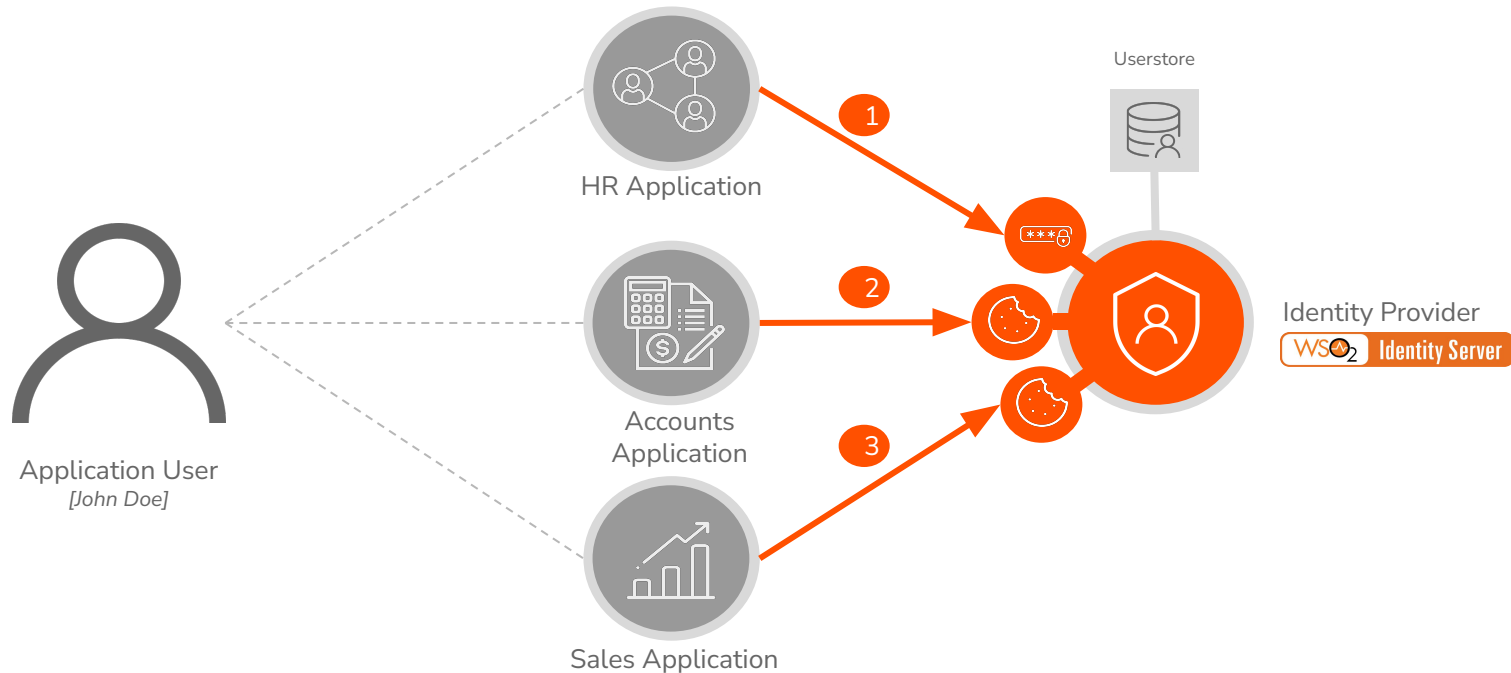

# Concerns with a Centralized Access Control System

- Low Productivity
- Poor User Experience
- Cost of Development
- Low Agility

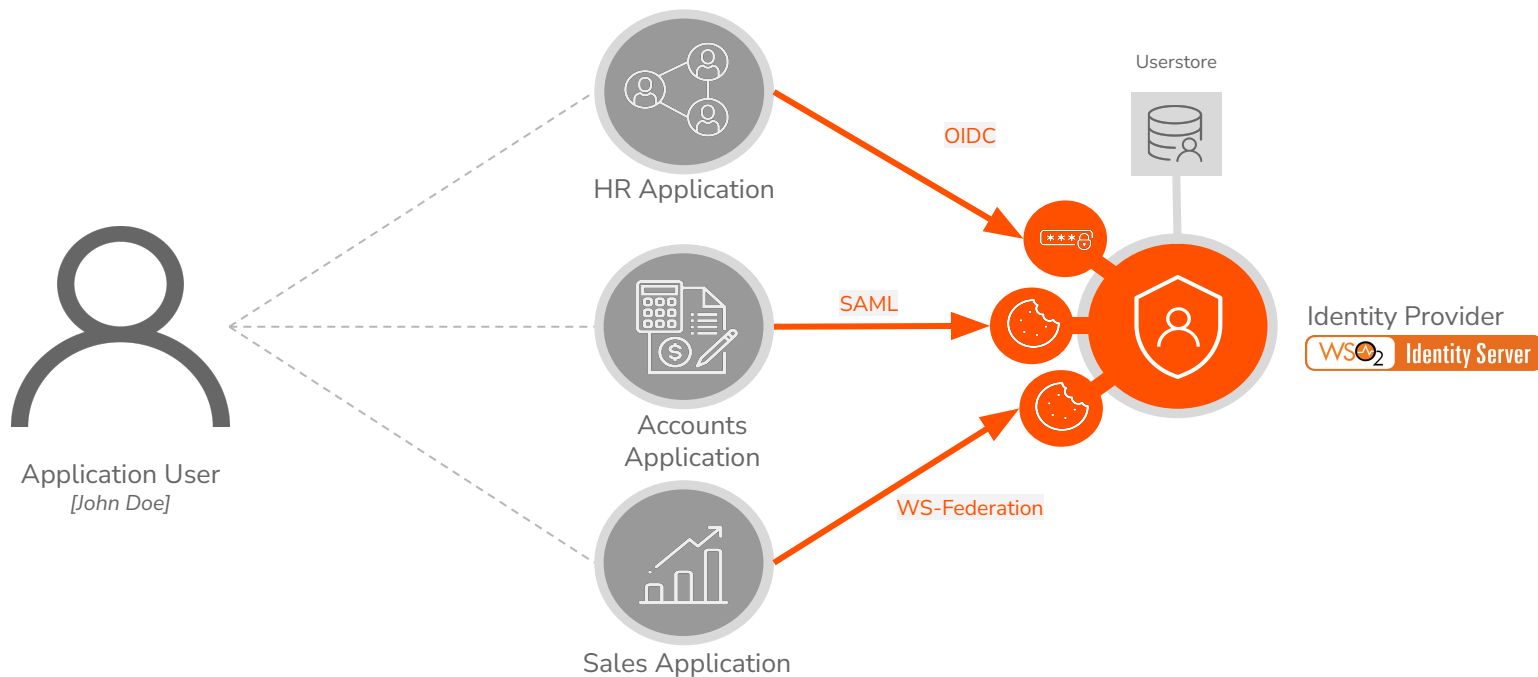

# Seamless Access with SSO

Sign in to one application and gain access to all the other applications sharing the same session

# Open Standards

For seamless integration between applications and identity providers

# Quick Recap

# What you learnt

1. Overview to application ecosystem
2. Centralized access control vs. SSO
3. Open standards for SSO
